

Bridging the Stream

In cooperation with Oakland County Parks and Recreation, Springfield Township and Lopez Engineering, the Davisburg Rotary, Divine Mercy Knights of Columbus and others have volunteered to replace the current pedestrian bridge at Rotary Park in Davisburg.

The eight-foot wide by 22-foot long bridge runs along Davisburg Road providing safe pedestrian access for residents into downtown Davisburg. The bridge crosses the stream flowing from the Davisburg Mill Pond into the Shiawassee Basin Preserve. It is part of a Springfield Township initiative for a safety path connecting Davisburg to Independence Township.

Celebrate and Commemorate

Fundraising efforts for bridge construction include the opportunity for residents to place an inscription on the boards of the new bridge. What better way to celebrate the life of a loved one, commemorate a special family event or honor a business associate than to share the beauty of nature?

Lopez Engineering STRUCTURAL CONSULTING

The cost is \$50 per inscription and includes 60 characters in two lines, on a 24-inch by 5.5-inch section of bridge planking. Price includes the cost of sandblasting and maintenance. Donations may be a tax-deductible contribution; consult a tax advisor for information.

Rotary Park Bridge Inscription Order Form
